Subject: Invitation to Visit Chicago and discuss the latest information on the West Vermont Strret Site
Date: Friday, April 25, 2014 1:13:16 PM

Dear Scott:

Shelly has asked me to reach out to the West Vermont PRPs and invite you, your clients, consultants and colleagues to come to Chicago again in a few weeks. Weston has developed a new three dimensional model for groundwater at the Site. EPA would like to show you this, and give you all an opportunity to ask questions about the model, as well as the conclusions we have reached regarding the Site which will be presented in a Technical Memorandum Weston is preparing.

Shelly is targeting the week of May 26th, or the following week, June 2, for a meeting in Chicago. You can let us know if you have preferred dates for such a meeting in Chicago in either of those two weeks at the end of May and the beginning of June. The weather here should be excellent at that time.

Hope that all is well with you and yours,

Thanks, Tom

Scott:

Here's the data packages you wanted to see.

Thanks, Tom_____

Tom: Thank you for your good wishes. It's been a difficult day and a difficult week.

In terms of your question regarding AMMH's technical presentation, the information we intend to present has been provided previously to EPA (e.g., in the Technical Response and in Minning's Letter Report).

We appreciate you sharing the "Summary of EPA Concerns" on Friday afternoon. As I have said all along, we think that our meeting will be more productive if both sides share their positions in advance. To that end, and in accordance with my prior requests, please distribute the "supporting materials" that EPA and Weston have apparently prepared as soon as possible, rather than waiting for Tuesday's meeting. Given the long history and sheer volume of data for this site, it may not be possible for our consultants to assess and respond on the fly to new technical information/analysis provided at the meeting.

With everyone traveling on Monday, I am not sure how much assessment of this new information can be done before Tuesday, but I'd like to try. I will be flying back to Denver tomorrow, so please copy my colleagues on any reply.

Thanks,

Scott

Scott:

Thank you for the document Tiffany sent in the form of a letter to EPA from AMMH, headed as a discussion of Legal Issues in the proposed ASAOC. I've forwarded copies to Shelly, Marcy and Larry Kyte. I assume this document is intended to convey the issues you wanted to discuss in Item IV: Legal and Policy Discussion, in your proposed agenda.

I am attaching a brief summary of EPA Concerns Regarding Data Collected, Presented and Interpreted by AIMCO's Consultants. This should serve as an outline for that portion (Section III B.) of the proposed agenda which you allotted for EPA to present its concerns.

In return, could you please provide a little more detail on what you intend to present as item A (1-4) on your proposed agenda?

Thanks, Tom

Dear Tom:

A draft agenda is attached. Please let me know if you have any comments. My father in law passed away on Tuesday and I will be traveling to the funeral tomorrow so forgive me if I am slow to respond.

For the same reason, please copy Pete Cappel on any comments to the agenda or on whatever technical concerns you are able to share in advance of Tuesday's meeting and he will be sure to share them with the AMMH team.

Finally, please confirm that our conference room will be equipped with AV equipment so that we can provide a powerpoint presentation on Tuesday.

Thanks, Scott

Scott:

Since this is a meeting you requested some time ago, I thought you would want to present whatever you wanted us to consider and then allow us some time to respond. If you give me a draft agenda and a hint of what you want to present to EPA, I think I can offer suggestions how to make sure we use the available time wisely to our common benefit.

I'll try to get you a copy of the McDaniel letter as soon as I can.

Thanks, Tom

Tom: I was hoping to receive more information on EPA's concerns on Monday or Tuesday and then planned to circulate an agenda that incorporated your issues. We can work something up in the meantime and get it over to you.

On a separate note, can you send me a copy of the McDaniel letter referred to in section IV.9.ww of the ASAOC? I don't have a copy.

Regards, Scott

Hello Scott:

EPA is working on a response to the Minnings Letter Report which will address some of the concerns I alluded to last week.

Do you have a draft agenda for next Tuesday's meeting yet? I'd be happy to look at your draft and make suggestions.

Hope all is well with you.

Thanks, Tom

Scott:

This email is sent to extend the deadline for your clients to sign the proposed Consent Order until Friday November 15, 2013.

I will work with Shelley to give you some more information regarding our concerns before the meeting. I will also work with you to help you develop an agenda which will make this meeting work as well as possible.

I look forward to working with you. I will get in touch with you again early next week. Meanwhile, have a nice weekend.

Thanks, Tom

Tom: I think developing a joint agenda makes a lot of sense. Please feel free to send your suggestions along anytime.

In addition, it would be helpful if you would provide more information regarding the concerns you reference below, as that will allow for a more thoughtful and productive discussion at our meeting in Chicago. We shared our concerns regarding the most recent EPA analysis with you last week for that very reason.

I also want to thank you again for scheduling the meeting on November 12, as that was the first date that worked for the AMMH team. Monday the 11th is a work day for us and, until you mentioned it this morning, I had not thought about some members of your team having to travel on a federal holiday. I'm sorry for any inconvenience, and again appreciate your flexibility.

I look forward to hearing from you soon.

Regards, Scott

Hi Scott:

You said to me as we spoke on the phone earlier today that you thought it was your (Aimco's) responsibility to prepare an agenda for the meeting.

As you develop that agenda, I think you should allow plenty of time for EPA to articulate some of its most serious concerns with the way your consultant has presented some of the data.

Please let me know when you have a draft agenda you can share with me. Maybe we can collaborate on developing a final agenda for the 11/12/13 meeting.

Thanks, Tom
